

Forestry Services Public Works & Natural Resources

Emerald Ash Borer (EAB) Management Program

NOTICE

THIS IS AN EMERALD ASH BORER "TRAP TREE"

This tree has been purposely stressed by City of Longmont Forestry Services to be used as a "Trap Tree" in order to attract adult EAB beetles to it. EAB has been found in Boulder and we are trying to determine if EAB is here in Longmont. EAB is a very destructive insect and will kill all Ash (*fraxinus* species) trees!

PLEASE DO NOT REMOVE THIS TAG OR ANY PARTS OF THIS TREE

Colorado Department of Agriculture quarantined Boulder County on 11/12/13. It is illegal to move firewood or any ash material out of Boulder County. Improper disposal of ash wood may result in spreading EAB. This tree will be removed by Forestry Services at a later date and carefully inspected for any signs of EAB beetles or larvae.

To learn about EAB visit:
